

# Power Generation

Power Market

Balance Without Compromise™

## A Guarantee To Stand Behind

---

Innova assumes full risk for new or existing site acoustic compliance and equipment performance requirements. With a history of more than 3,500 successful projects, a full line of noise control products and our Balanced Design Approach™ to reduce your cost, we are your single source provider of complete, cost-effective noise and emissions control and heat recovery solutions.

## Full Gas Turbine & Balance of Plant Product Line

---

At Innova, we've worked to cover your power plant needs right from the start. Over the past three decades, we've grown an impressive portfolio of Original Equipment Manufacturers (OEM) approved products and premium quality products for not only the gas turbine train but balance of plant as well.

- » Inlet filter houses
- » Intake silencing systems
- » Anti-icing / inlet heating systems
- » Exhaust diffusers
- » SCR / CO systems for NOx and CO removal
- » Bypass systems / diverter dampers
- » Higgott-Kane™ gas turbine exhaust systems
- » Heat recovery steam generators & waste heat boilers
- » Acoustic buildings
- » Acoustic equipment enclosures
- » Acoustic ventilation systems
- » Custom designed silencers
- » Acoustic barriers
- » Turnkey acoustic enclosure packages

## Experienced, OEM-Approved Supplier

We've proudly engineered and supplied our advanced systems to many Original Equipment Manufacturers around the globe.

**Siemens** | **General Electric** | **Solar Turbines**  
**Dresser-Rand Alstom** | **Rolls-Royce** | **Nuovo Pignone**  
**Hitachi**

## Full Service Capability, Expert Advice

Our toolkit contains everything you need to successfully take your project from site analysis to detailed engineering, fabrication and supply, installation and post-construction testing — anywhere in the world.

- » Accredited, multi-disciplinary engineering professionals
- » Advanced testing, modeling and analysis
- » In-house design teams, estimators, QA inspectors and project managers
- » Experience with applicable standards and codes
- » Rigorous quality assurance program registered to ISO 9001-2008
- » ISO pre-qualified global suppliers and manufacturers
- » Global fabrication supervision and installation

## We're Ready For Your Challenge

We've built our excellent reputation on our willingness to take on those projects other companies will not — and succeed. We never back down from a challenge or stop striving to meet our customers' requirements.

- » Sub-specialty in low frequency & octave band mitigation
- » NOx and CO removal to the most stringent standards
- » Balanced Design Approach™ optimizing both design and cost
- » R&D program producing innovative and industry-leading products
- » Retrofit and after-market services that ensure continued compliance and equipment longevity
- » Relentless attention to safety
- » Global capabilities
- » Guaranteed performance

---

# Reduce Emissions & Improve Plant Performance

NEW BRAND, UNPARALLELED EXPERIENCE

You may have known us as Higgott-Kane Industrial Noise Controls, or more recently, ATCO Emissions Management. Under our new name as Innova, we bring new products to power generation and 40 years of experience and expertise gained by successfully completing more than 3,500 projects in 54 countries.

As always, our customers recognize that Innova represents quality products and services backed by an uncompromising guarantee.

At Innova, we deliver guaranteed emissions control and heat recovery solutions with single-source responsibility... Allowing you to focus on what you do best.

Balance Without Compromise™
