**For Immediate Release**

**INNOVA LAUNCHED AS NEW NAME FOR ATCO EMISSIONS MANAGEMENT**

CALGARY, Alberta – **Innova Global Limited (Innova)** has been selected as the new name for ATCO Emissions Management to better reflect the company’s innovative approach to developing products and providing industry leading solutions and services to our clients.

“Innova is inspired by innovation-- the principle that has led to the launch of eight new products since 2009, complementing our complete acoustic mitigation products, and to better service the needs of our global customers,” said Harry Wong, President & CEO. “The name reflects our highly technical products and services which help our customers manage their emissions, increase efficiency, shelter equipment, and improve capacity utilization with modular process systems.”

Innova rolls together previous operating entities of ATCO Emissions Management, ATCO Noise Management and Higgott-Kane. Our products and services are comprehensive, including gas turbine filterhouses, intake silencers, diverter dampers, bypass stacks with silencers, hot selective catalytic reduction, hot exhaust stacks with silencing, heat recovery steam generators, waste heat recovery boilers, turnkey acoustic or non-acoustic industrial buildings, acoustic enclosures, acoustic barriers, and turnkey modular compressor stations for unconventional gas. Innova holds several patents, proprietary products and branded design tools and data.

Since 1977, Innova strives to provide exceptional customer service, undertaking challenging projects in over 34 countries, and working with some of the most prestigious companies around the world. Innova has delivered guaranteed performance and compliance on more than 3,500 projects.

Innova is a full service engineering, fabrication, procurement and construction company specializing in air and noise emissions control, acoustic consulting, gas turbine systems, heat recovery, modular gas compression facilities, and turnkey building solutions primarily for oil & gas, power generation, and industrial customers.

Innova has 160 employees between its offices in Calgary, Alberta; Cambridge, Ontario; Tulsa, Oklahoma; Plymouth, Minnesota; Albany, New York; Denver, Colorado; Houston, Texas; Pittsburgh, Pennsylvania; and fabrication facilities in Monterrey, Mexico.
